Seminar on "Exploring Civilizational Linkages & Cultural Similarities between India & Lebanon "

As part of the ongoing Special week of Azadi ka Amrit Mahotsav, the Embassy of India, Beirut organized a seminar in cooperation with the Elite Center of Culture and Education in Tripoli on November 3, 2021. The topic of the seminar was, "Exploring Civilizational Linkages and Cultural Similarities Between India and Lebanon."

The Director General, Ministry of Culture, Lebanon and Ambassador of India to Lebanon Dr. Suhel Ajaz Khan were the keynote speakers for this event. The event was also graced by the presence of several prominent members of the Lebanese civil society of Tripoli. The seminar attracted large-scale participation from several sections ranging from students to businessmen.

The opening remarks for this seminar was delivered by the President of Elite Center of Culture and Education, Dr. Imane Dernaika Kamali. She spoke at length about the civilizational history of both the nations and the essence of humanity binding the two nations together. She urged the Ministry of Culture, Lebanon to enhance the cultural ties of Lebanon with India.

Her remarks were followed by the speech of Director General Ministry of Culture, Dr. Ali Al-Samad. He called India as the, "Cradle of Eastern Wisdom" and paid reverence to the philosophies of Mahatma Gandhi, Rabindranath Tagore and others. He mentioned of establishing clear frameworks for cultural cooperation and showed eagerness to host Indian artists in various field of Arts, especially cinema and theatre.

Embassy News

Followed by the Director General's speech, the Ambassador shared his valuable insights on the Civilization and cultural linkages that both the nations cherish and rejoice. He shed light on the historical relations since the ancient times to the modern era of our independence. He navigated through the similarities that we share in various domains of political system, cuisines, music and dance etc. He said about the rich tribal handicrafts and artifacts which are on popular demand in the global arena. He eloquently emphasized on how India is becoming an educational hub and making a mark as a Centre for education globally with its quality education and affordability.

The seminar gave a glimpse of the culture harmony among both the nations where few songs were played through piano by a renowned pianist. A painting symbolizing the brotherly relation between the nations was presented to the Ambassador. The cultural performance was followed by awarding certificates to the participants who took part in the online session on Gandhian Philosophy. The prominent dignitaries were presented with shield as a token of love and friendship from India for their valuable cooperation in enhancing the cultural ties between the two nations.

It was followed by a reception where Indian and Lebanese delicacies were served. The seminar was very eventful as it brought up the rich cultural heritage of India to the civil society which will surely help in bridging the cultural ties among the two nations.

Business Seminar in association with CCIAT, Tripoli

As part of ongoing activities related to Azadi Ka Amrit Mahotsav (AKAM) and in an effort to enhance bilateral trade and economic cooperation, the Embassy of India organised a Business Seminar in Tripoli, the Economic Capital of Lebanon, on November 04, 2021 in association with CCIAT (Chamber of Commerce, Industry & Agriculture of Tripoli and North Lebanon). Tripoli is the second largest city in Lebanon and is a very important economic hub. More than 30 participants attended the Seminar. The Seminar was co- chaired by Chamber President Mr. Toufic Dabbousi and Ambassador Dr Suhel Ajaz Khan. Mr. Dabbousi provided insights and ideas about Tripoli that is poised to play a major role in the region. Ambassador Dr. Suhel Ajaz Khan in his presentation, highlighted the incredible growth of India, Indian economy and the measures taken by the Government under the leadership of Hon'ble Prime Minister to make India a favourite destination for investment and conducting business. Ambassador spoke on how India has risen in the ranking for "Doing Business" over the past few years and highlighted India's march towards a US\$ 5 trillion economy. He spoke about post-COVID economic recovery in India. On the bilateral trade potential, Ambassador spoke about exploring new areas of cooperation. He spoke about sectors such as Gems and Jewellery, Pharma, Food and Engineering Goods, Solar Panels, Textiles and Machinery sectors. Ambassador emphasized that increasing imports from India would be beneficial for Lebanon in this hour of crisis as Indian products are more cost-effective and will bring down their overall import bill. Ambassador also welcomed Lebanese exporters to explore Indian market. He encouraged them to participate in the upcoming trade exhibitions in India like Indus Food, Stone Mart etc. Ambassador also informed them that businessmen in India are very keen to expand their business in Lebanon. Ambassador also assured them to provide business visas expeditiously. Mr. Toufic Dabbousi, reiterated the views of Ambassador about the potential of bilateral trade between Indian and Lebanon and encouraged all businessmen to look at India as a source for their import needs. Ambassador briefed them about opening up of Tourist visas and encouraged all of them to visit India.

Embassy News

Embassy of India, Beirut celebrated Diwali on November 5, 2021 at the Embassy premises. The celebration was attended by the Embassy staff, their families and many members of the Indian community. The event was full of celebratory activities, games, rangoli, sparklers, etc.

National Statement by Prime Minister Shri Narendra Modi at COP26 Summit in Glasgow

November 02, 2021

Friends,

Today I am representing amid you, the land which gave this mantra thousands of years ago-

सम्-गच्छ-ध्वम्,

सम्-व-दद्वम्,

सम् वो मानसि जानताम्।

Today in the 21st century, this mantra has become more important and more relevant. सम्-गच्छ-ध्वम् - That is, let's move together सम्-व-दद्वम् - That is, let's all interact together and सम् वो मनानसि जानताम् - That is, everyone's minds should also be one.

Friends,

When I first came to Paris for the Climate Summit, it was not my intention to add one promise to the many promises already being made in the world. I came with a concern for the humanity. I came as a representative of a culture that gave the message of 'Sarve Bhavantu Sukhinah', which means Happiness for All. And so, for me the event in Paris was not a summit, it was a sentiment and a commitment. And India was not making those promises to the world, but 125 crore Indians were making those promises to themselves.

And I am happy that a developing country like India, which is working to lift crores of people out of poverty, and which is working day and night on the Ease of Living for crores of people, today, despite being 17 % of the world's population, whose responsibility has been only 5 percent in emissions, it has left no stone unturned to show that it has fulfilled its obligation. Today the whole world believes that India is the only big economy which has delivered in letter and spirit on the Paris Commitment. We are making every effort with determination; and we are working hard and showing results.

News of The Month

Friends,

Today, as I come among you, I have brought India's track record. My words are not just words; they are announcements of a bright future for our future generations. Today, India ranks 4th in the world in installed renewable energy capacity. India's non-fossil fuel energy has increased by more than 25% in the last 7 years and now it has reached 40% of our energy mix.

Friends,

Every year more passengers travel by Indian Railways than the population of the world. This huge railway system has set a target of making itself 'Net Zero' by 2030. This initiative alone will lead to a reduction of emissions by 60 million tonnes annually. Similarly, our massive LED bulb campaign is reducing emissions by 40 million tonnes annually. Today, India is working at a faster pace on many such initiatives with a strong will.

Along with this, India has also given institutional solutions to cooperate with the world at the international level. As a revolutionary step in solar power, we initiated the initiative of International Solar Alliance. We have created a coalition for disaster resilient infrastructure for climate adaptation. This is a sensitive and vital initiative to save millions of lives.

Friends,

I would like to draw your attention to one more important topic. Today, the world admits that lifestyle has a big role in climate change. So, I propose before you a One-Word Movement.

This One-Word, in the context of climate, can become the basic foundation of One World. This word is- LIFE...L, I, F, E, which means Lifestyle For Environment. Today, there is a need for all of us to come together and take Lifestyle For Environment (LIFE) forward as a campaign.

This can become a mass movement of Environmental Conscious Life Style. What is needed today is Mindful and Deliberate Utilization, instead of Mindless and Destructive Consumption. These movements together can set goals that can revolutionize many sectors in diverse areas such as Fishing, Agriculture, Wellness, Dietary Choices, Packaging, Housing, Hospitality, Tourism, Clothing, Fashion, Water Management and Energy.

These are subjects where each of us has to make conscious choice every day. These choices exercised by billions of people daily around the world, will take the fight against climate change, billions of steps forward every day. And I consider it as a movement on all grounds like on economic grounds, on scientific grounds, on the basis of the experiences of the past century, it meets every criterion. This is the path of self-realization. This is the only way to benefit.

News of The Month

Friends,

In the midst of this global brainstorming on climate change, on behalf of India, I would like to present five nectar elements, 'Panchamrit', to deal with this challenge.

First- India will take its non-fossil energy capacity to 500 GW by 2030.

Second- India will meet 50 percent of its energy requirements from renewable energy by 2030.

Third- India will reduce the total projected carbon emissions by one billion tonnes from now till 2030.

Fourth- By 2030, India will reduce the carbon intensity of its economy by less than 45 percent.

And fifth- by the year 2070, India will achieve the target of Net Zero.

These 'Panchamrits' will be an unprecedented contribution of India to climate action.

Friends,

We all know this truth that the promises made till date regarding climate finance have proved to be hollow. While we all are raising our ambitions on climate action, the world's ambitions on climate finance cannot remain the same as they were at the time of the Paris Agreement.

Today, when India has resolved to move forward with a new commitment and a new energy, the transfer of climate finance and low cost climate technologies have become more important. India expects developed countries to provide climate finance of \$1 trillion at the earliest. Today, it is necessary that as we track the progress made in climate mitigation, we should also track climate finance. The proper justice would be that the countries which do not live up to their promises made on climate finance, pressure should be put on them.

Friends,

Today India is moving forward on the subject of climate with great courage and great ambition. India also understands the suffering of all other developing countries, shares them, and will continue to express their expectations.

For many developing countries, climate change is looming large over their existence. We have to take big steps today to save the world. This is the need of the hour and this will also prove the relevance of this forum. I am confident that the decisions taken in Glasgow will save the future of our future generations, giving them the gift of a secure and prosperous life.

Speaker Sir, I took extra time, I apologize to you for that. But I consider it as my duty to raise the voice of developing countries. That's why I have emphasized on that too. I once again thank you very much.

News of The Month

PM Modi: Team India: Responding to adversity with achievement

India completed vaccination of 100 crore (one billion) doses on October 21, 2021, in just about nine months since starting vaccination. This has been a tremendous journey in dealing with Covid-19, especially when we recall how things stood in early 2020. Humanity was dealing with such a pandemic after 100 years and no one knew much about the virus. We remember how unpredictable the situation appeared then, as we were faced by an unknown and invisible enemy mutating rapidly. The journey from anxiety to assurance has happened and our nation has emerged stronger, thanks to the world's largest vaccination drive.

It has been a truly 'bhagirath' effort involving multiple sections of society. To get a sense of the scale, assume that each vaccination took just two minutes for a healthcare worker. At this rate, it took around 41 lakh (4.1 million) man days or approximately 11,000 thousand man years of effort to reach this landmark.

For any effort to attain and sustain speed and scale, trust of all stakeholders is crucial. One of the reasons for the success of the campaign was the trust that people developed in the vaccine and the process followed, despite various efforts to create mistrust and panic.

There are some among us who only trust foreign brands, even for simply everyday necessities. However, when it came to something as crucial as the Covid-19 vaccine, the people of India unanimously trusted 'Made in India' vaccines. This is a significant paradigm shift.

India's vaccine drive is an example of what India can achieve if the citizens and the government come together with a common goal in the spirit of Jan Bhagidari. When India started its vaccination programme, there were many people who doubted the capabilities of 130 crore (1.3 billion) Indians. Some said India would take 3-4 years. Some others said people will not come forward to get vaccinated. There were those who said there will be gross mismanagement and chaos in the vaccination process. Some even said that India will not be able to manage supply chains. But just like the Janta Curfew and subsequent lockdowns, the people of India showed how spectacular the results can be, if they are made trusted partners.

When everyone takes ownership, nothing is impossible. Our healthcare workers traversed hills and crossed rivers across difficult geographies to vaccinate people. Our youth, social workers, healthcare workers, social and religious leaders, all deserve credit for the fact that India faces minimal vaccine hesitancy when compared to even developed nations.

There was a lot of pressure from different interest groups to give preferential treatment to them in vaccination. But the Government ensured that, like our other schemes, there is no VIP culture in the vaccination drive either.

News of The Month

In early 2020, when Covid-19 was rampaging across the world, it was clear to us that this pandemic will have to be eventually fought with the help of vaccines. We started preparing early. We constituted expert groups and started preparing a roadmap right from April 2020. Till today, only a handful of countries have developed their own vaccines. More than 180 countries are dependent on an extremely limited pool of producers and dozens of nations are still waiting for the supply of vaccines, even as India has crossed 100 crore (one billion) doses! Imagine the situation if India did not have its own vaccine. How would have India secured enough vaccines for such a large population and how many years would that have taken? It is here that credit should be given to Indian scientists and entrepreneurs for rising to the occasion. It is due to their talent and hard-work that India is truly Aatmanirbhar when it comes to vaccines. Our vaccine manufacturers, by scaling up to meet the demands of such a large population, have shown that they are second to none.

In a nation where governments used to be known as a roadblock impeding forward movement, our government has instead been an accelerator and enabler of progress. The government partnered with the vaccine makers right from day one and gave them support in the form of institutional assistance, scientific research, funding, as well as accelerated regulatory processes. All ministries of the government came together to facilitate the vaccine makers and remove any bottlenecks as a result of our 'whole of Government' approach.

In a country of the scale of India, it is not enough to just produce. Focus has to be on last mile delivery and seamless logistics. To understand the challenges involved, imagine the journey taken by one vial of vaccines. From a plant in Pune or Hyderabad, the vial is sent to a hub in any of the states, from where it is transported to the district hub. From there, it reaches a vaccination centre. This entails the deployment of thousands of trips taken by flights and trains. During this entire journey, the temperature has to be maintained in a particular range, which is centrally monitored. For this, over 1 lakh (100,000) cold-chain equipments were utilised. States were given advance notice of the delivery schedule of the vaccines so that they could plan their drives better and vaccines reached them on the pre-decided days. This has been an unprecedented effort in the history of independent India.

All these efforts were complemented by a robust tech platform in CoWIN. It ensured that the vaccine drive was equitable, scalable, trackable, and transparent. This ensured that there was no scope for favouritism or jumping the queue. It also ensured that a poor worker could take the first dose in his village and the second dose of the same vaccine in the city where he works, after the required time interval. In addition to a real-time dashboard to boost transparency, the QR-coded certificates ensured verifiability. There are hardly any examples of such efforts not only in India but also the world.

In my Independence Day Address in 2015, I had said that our country is moving ahead because of 'Team India' and this 'Team India' is a big team of our 130 crore people. People's participation is the biggest strength of democracy. If we run the country through the participation of 130 crore Indians, our country will be moving ahead 130 crore steps every moment. Our vaccination drive has yet again showed the power of this 'Team India'. India's success in its vaccination drive has also demonstrated to the whole world that 'democracy can deliver'.

I am optimistic that the success achieved in the world's largest vaccination drive will further spur our youth, our innovators and all levels of government to set new benchmarks of public service delivery which will be a model not only for our country, but also for the world.

Featured Stories

Akshardham-Delhi Temple

'Akshardham' means the divine abode of God. It is hailed as an eternal place of devotion, purity and peace. Swaminarayan Akshardham at New Delhi is a Mandir – an abode of God, a Hindu house of worship, and a spiritual and cultural campus dedicated to devotion, learning and harmony. Timeless Hindu spiritual messages, vibrant devotional traditions and ancient architecture all are echoed in its art and architecture. The mandir is a humble tribute to Bhagwan Swaminarayan (1781- 1830), the avatars, devas and great sages of Hinduism. The traditionally-styled complex was inaugurated on 6 November 2005 with the blessings of HH Pramukh Swami Maharaj and through the devoted efforts of skilled artisans and volunteers.

Each element of Akshardham echoes with spirituality – the Mandir, the Exhibitions and even the Gardens.

The Akshardham mandir has over two hundred murtis, representing many of the spiritual stalwarts over many millennia. The spiritual premise of Akshardham is that each soul is potentially divine. Whether we are serving the family, the country our neighbors or all living beings the world over , each service can help one move towards divinity. Each prayer is a call towards improving oneself and moving closer to God.

A visit to Akshardham is a spiritually enriching experience. Whether it is in realising the power of prayer, in feeling the strength of non-violence, in being aware of the universal nature of Hinduism's ancient principles, or just in admiring the beauty of God's abode on Earth -- each element has a spiritual significance.

India Tourism

West Bengal

West Bengal is located in the eastern part of India on the Bay of Bengal, covering total area of 88,752 Kms. The state is surrounded by Sikkim and Bhutan in the north, Assam in the northeast, Bangladesh in the east, Bay of Bengal in the south, Odisha in the southwest, Jharkhand & Bihar in the west, and Nepal in the northwest.
